Monthly Active Customer Trend

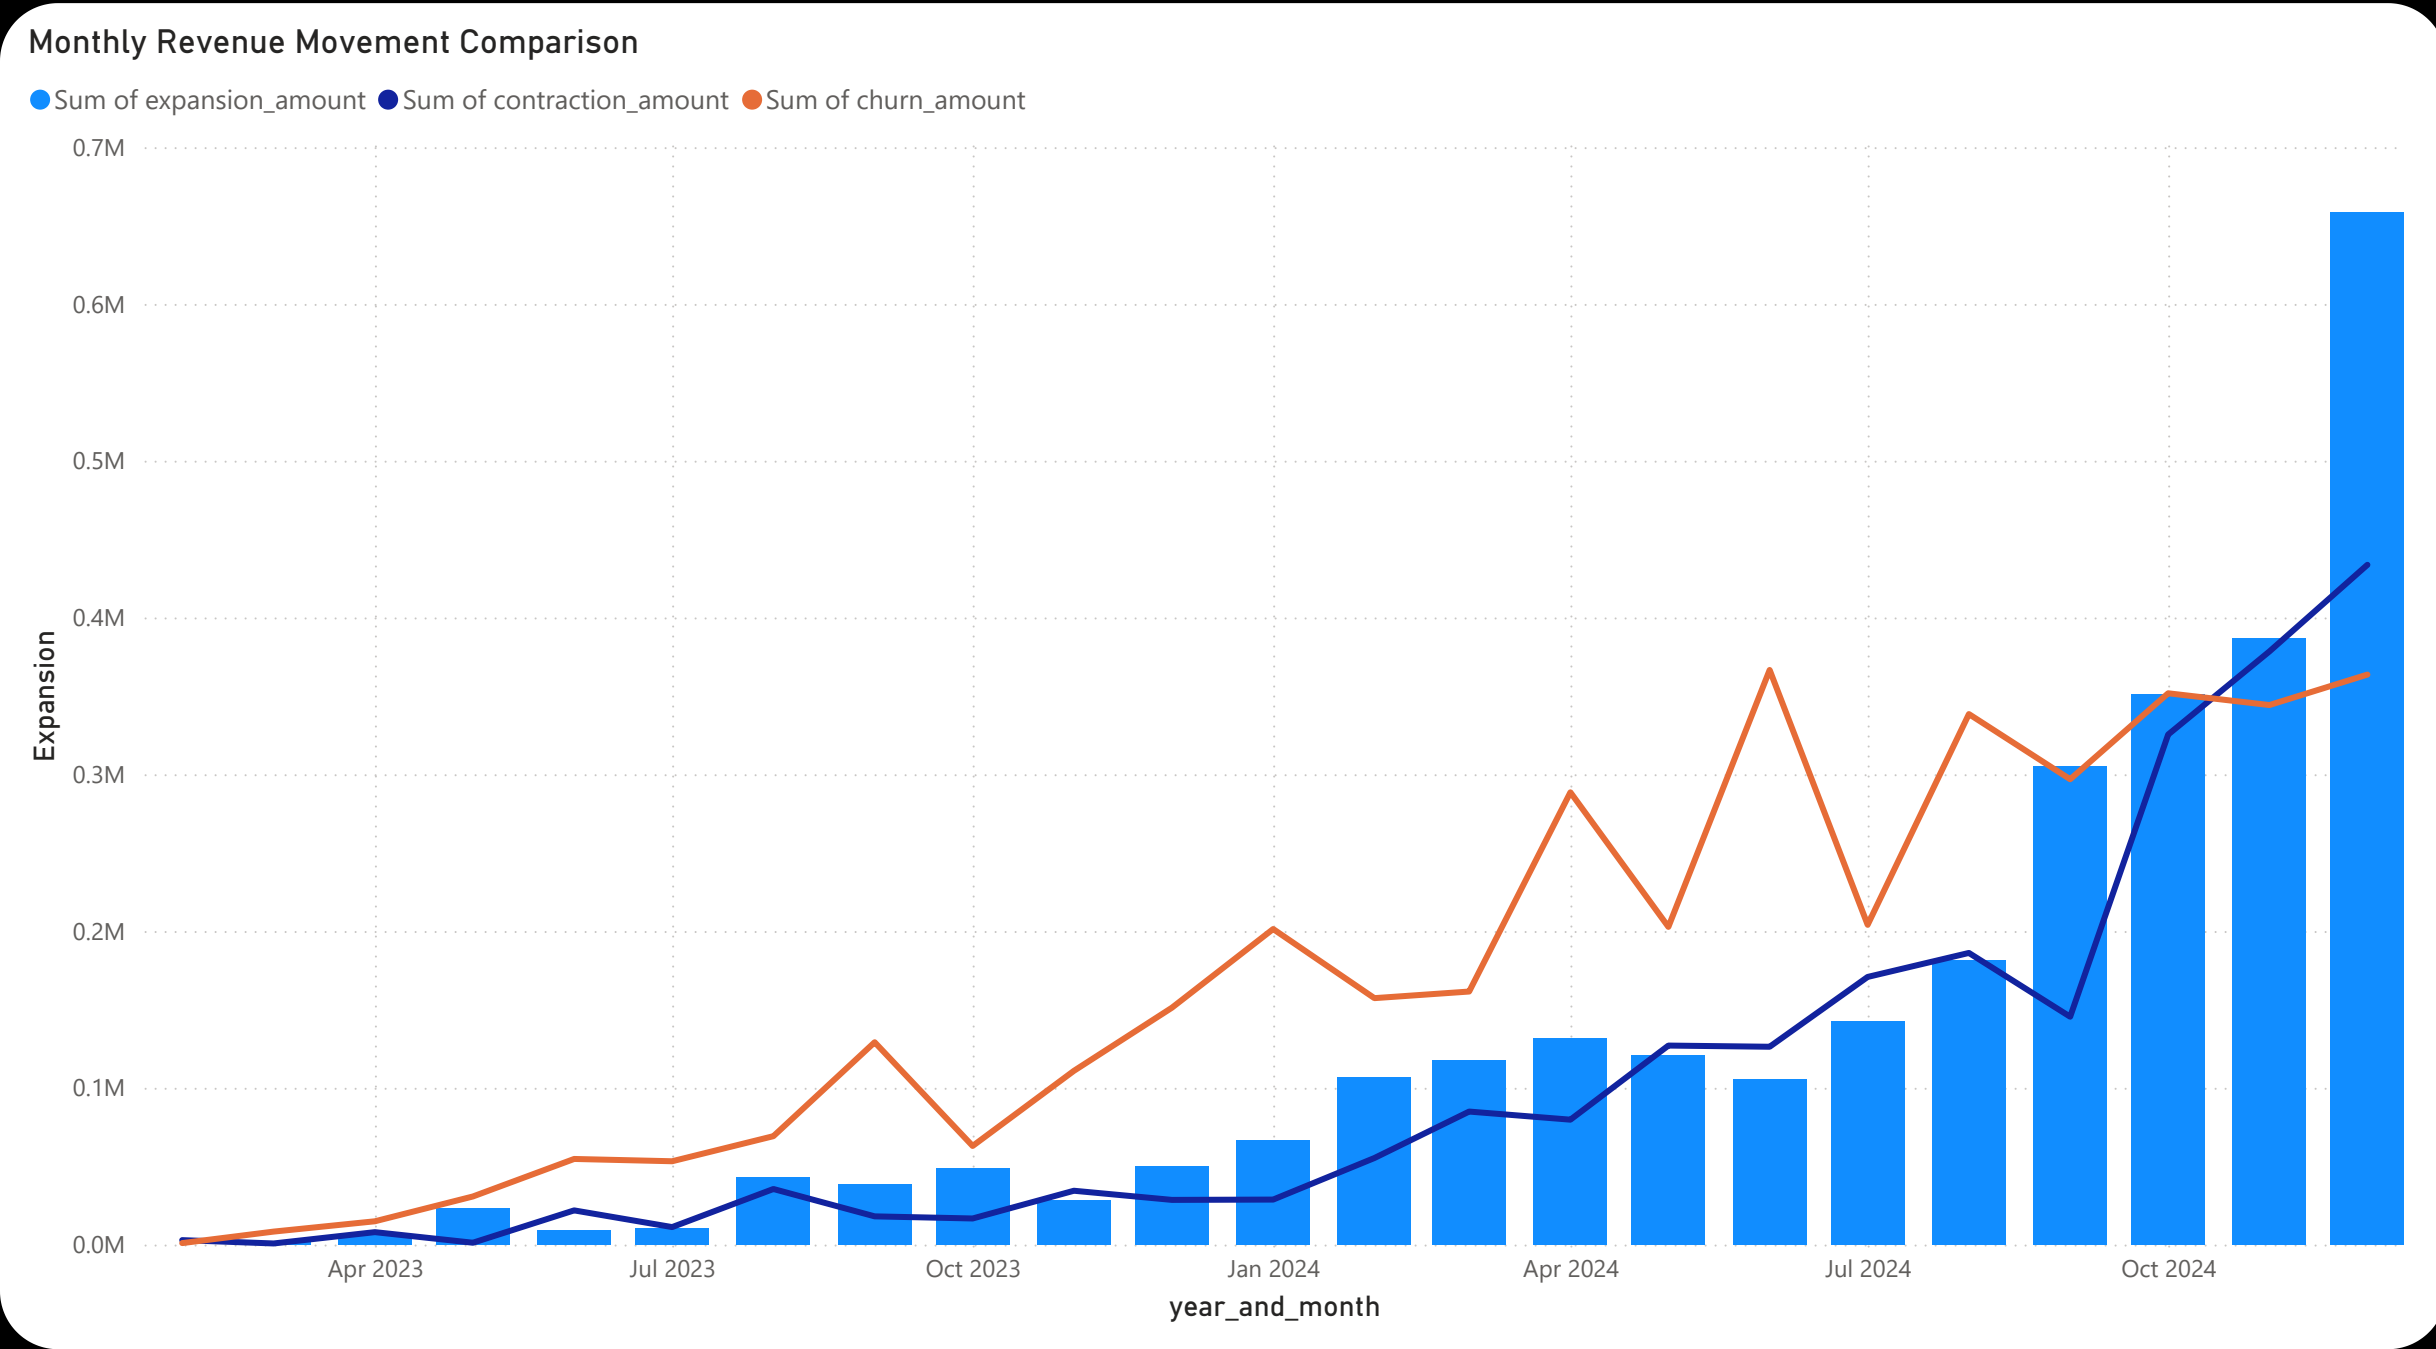

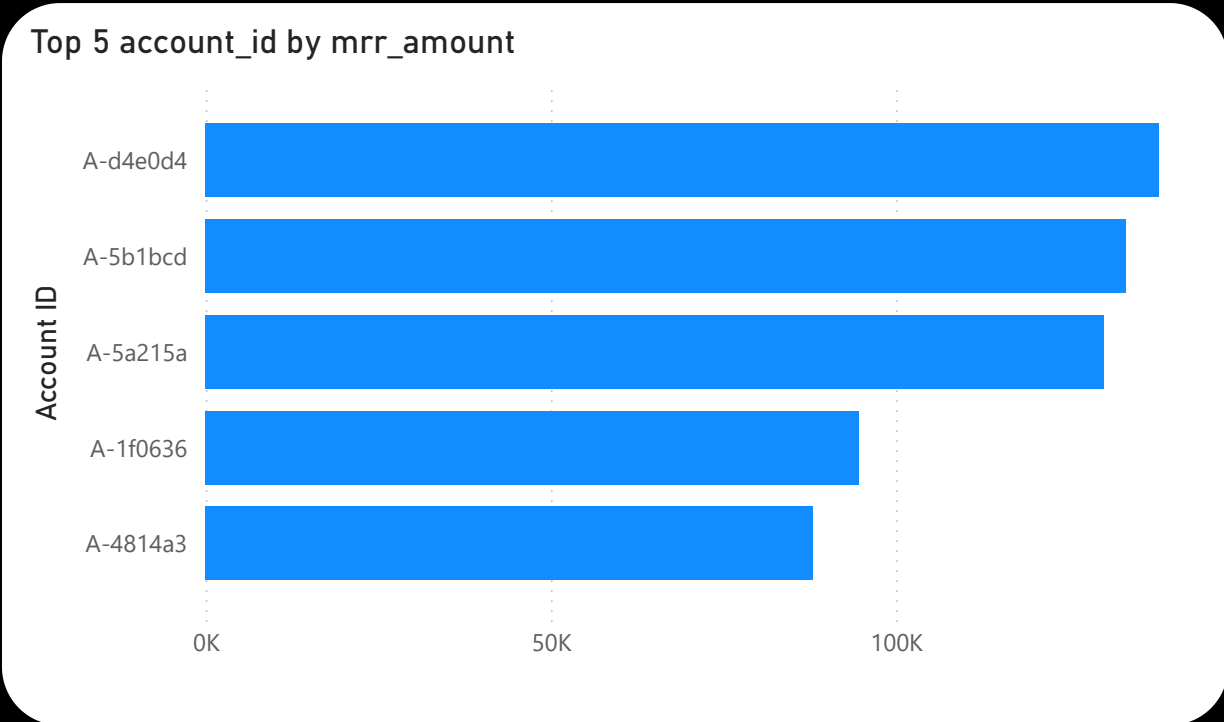

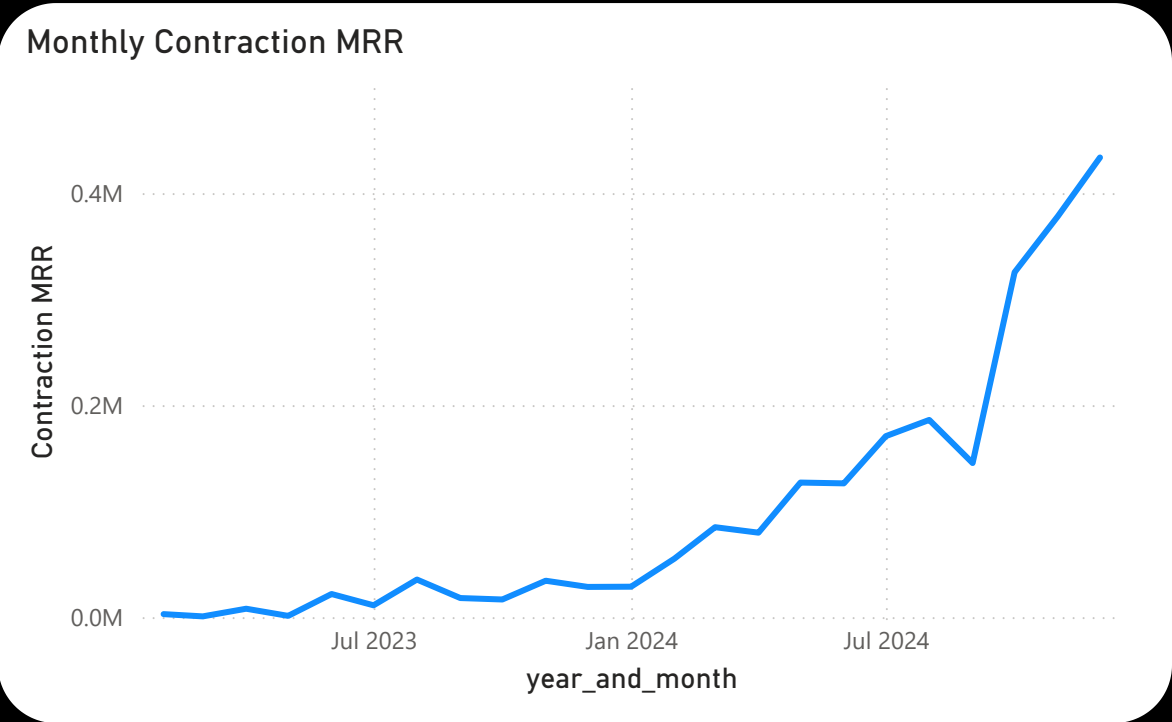

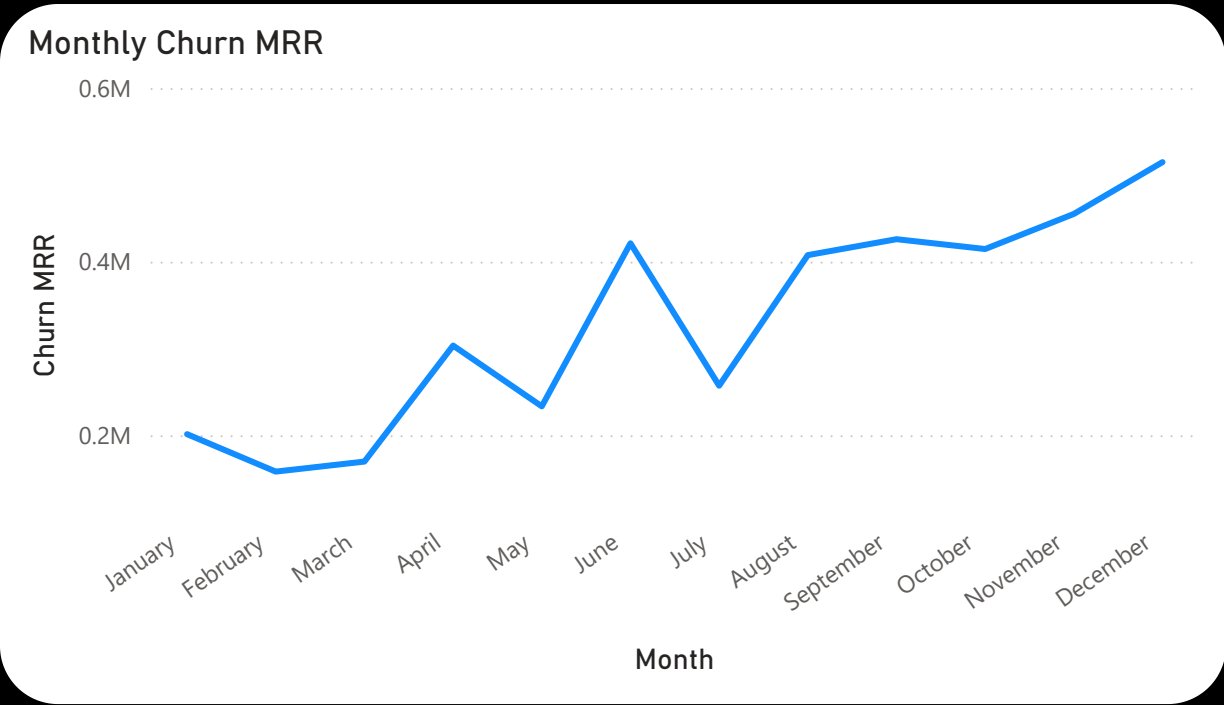

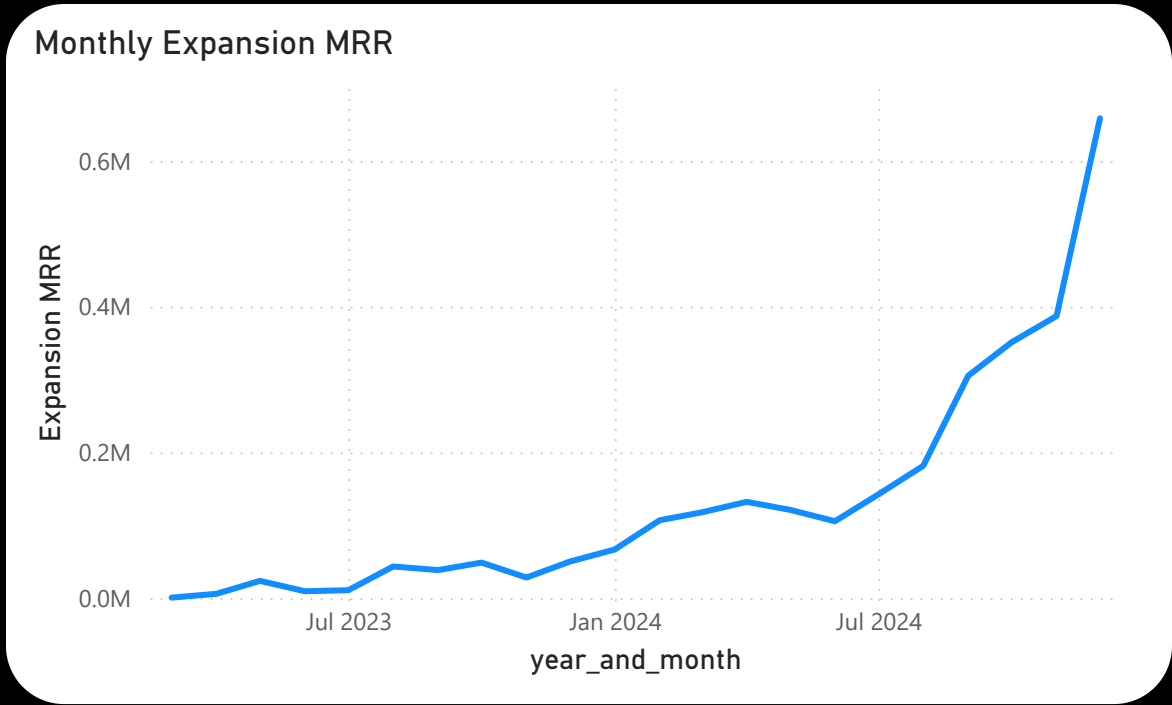

Monthly NRR Trend

Business Insights

- **Monthly Recurring Revenue (MRR)** reached ₹11.34M, showing consistent revenue growth throughout the analysis period.
- **Active customers increased steadily** over time, indicating successful customer acquisition and retention efforts.
- **Latest Net Revenue Retention (NRR)** is 91.05%, suggesting most recurring revenue was retained despite customer losses.
- **Revenue Lost (₹6.28M) exceeds Expansion MRR (₹2.93M)**, indicating that reducing churn and contraction should be a higher priority than relying solely on customer expansion.

Revenue Movement Analysis

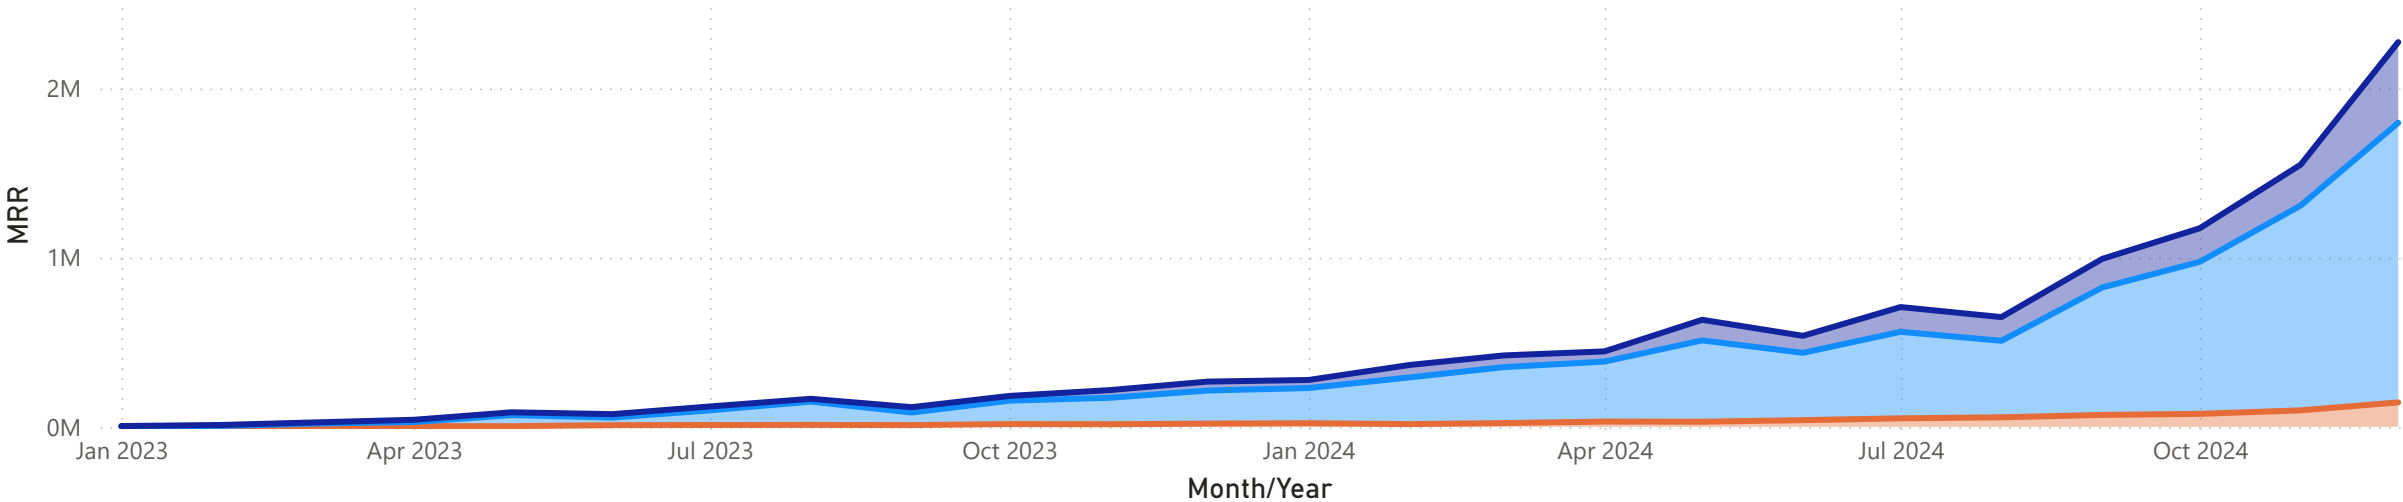

Business Insights

- Expansion MRR accelerated significantly in the final quarter of 2024.
- Churn MRR also increased over time, reducing net revenue growth.
- Revenue contraction remained below churn for most of the analysis period.
- The simultaneous increase in expansion and churn suggests strong customer acquisition but weaker long-term retention.

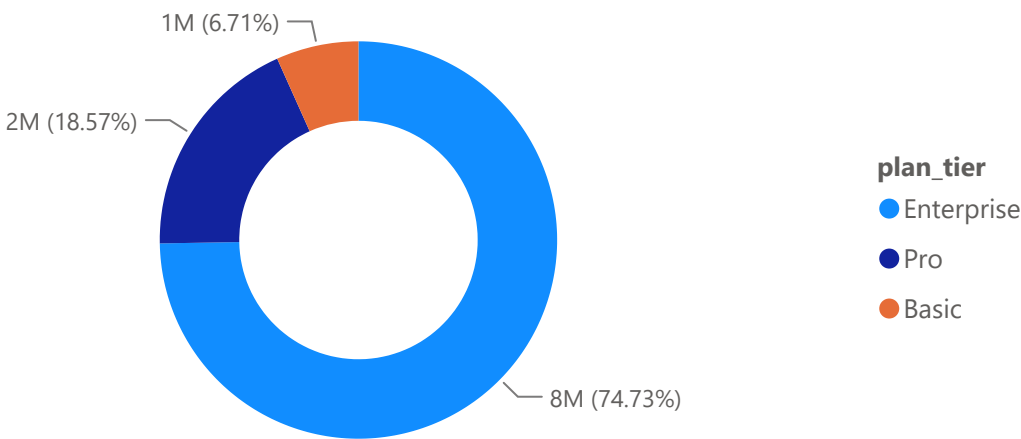

Plan Performance Analysis

Monthly MRR Trend by Plan

plan_tier Basic Enterprise Pro

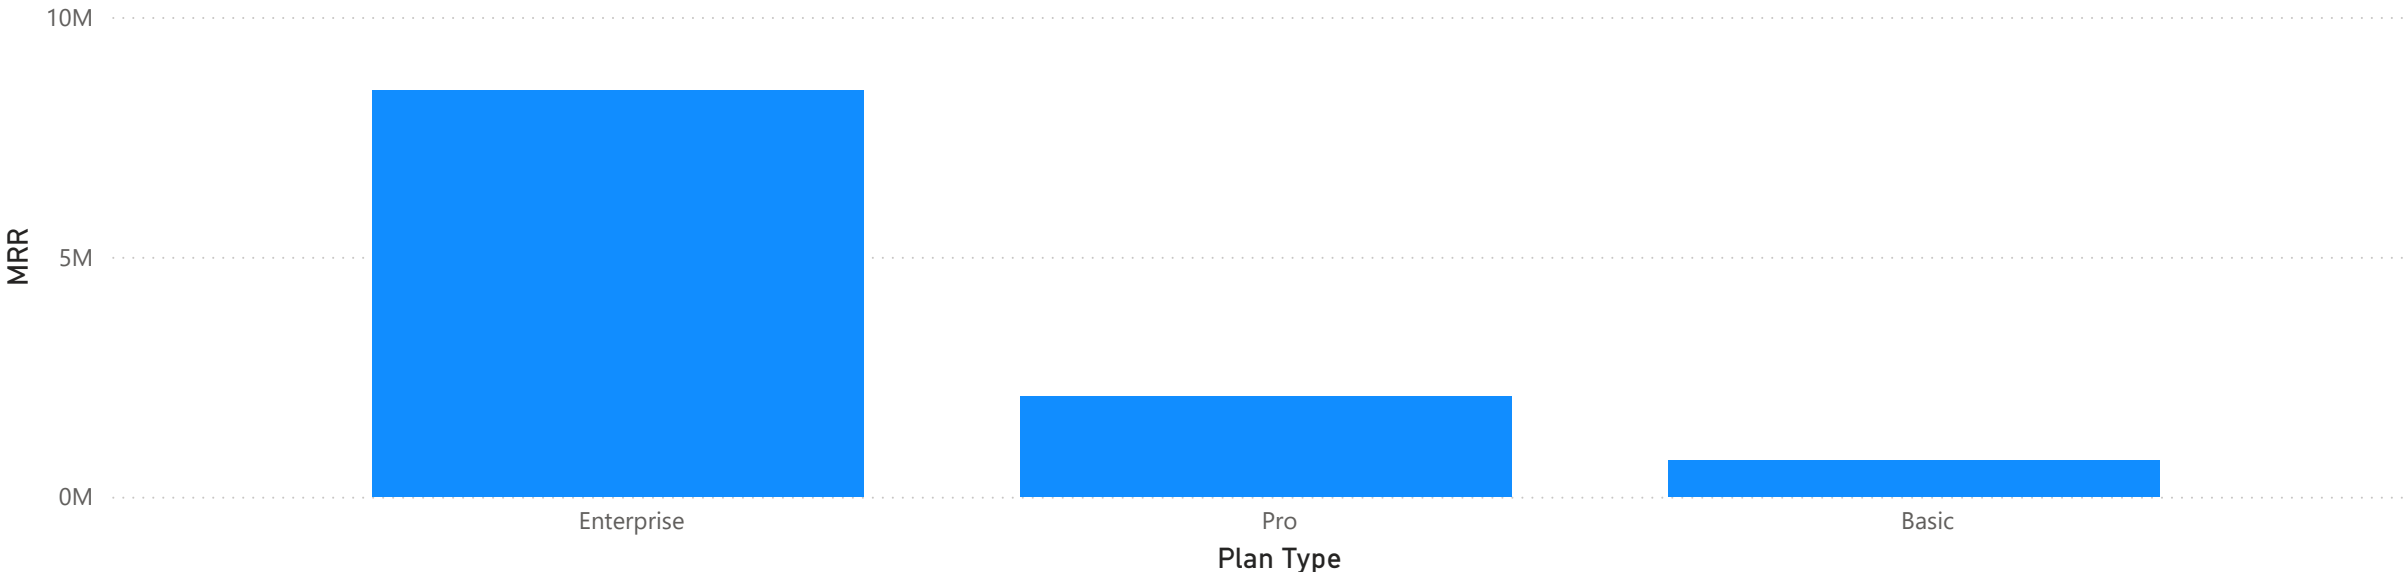

Revenue Distribution by Plan

Plan Type Total Revenue Average MRR

Basic	760437	31684.88
Enterprise	8473221	353050.88
Pro	2105089	87712.04
Total	11338747	157482.60

Total Revenue by Plan

Business Insights

- Enterprise plans generated approximately **75%** of total recurring revenue.
- Pro plans contributed around **19%**, making them the second-largest revenue source.
- Basic plans accounted for less than **10%** of total MRR.
- Revenue growth across the analysis period was primarily driven by Enterprise customers.
